

Protect your practice with ABEL's Remote Data Backup and Disaster Recovery Virtual Server Services

Cyber Attacks are Threatening Your Healthcare Data!

Unfortunately, not a week goes by without us hearing about one of our valued customers falling victim to a Ransomware attack.

What's at risk?

The loss of your financial records, patient files, documents, schedules, and more! Once this data is gone you may not be able to replace it without a proper contingency plan.

How can ABEL help?

For your Peace of Mind, we offer Remote Data Backup and Disaster Recovery Virtual Server Services that provide an efficient, affordable way to put systems in place to help recover your valuable practice data.

Ransomware and the failure or theft of an office's computer, hard drive, network or operating system can be catastrophic for your practice. In addition, environmental threats and hazards such as fires, storms, floods, power failures, and electrical surges can cause serious – sometimes irreparable – damage in the absence of proper planning.

We'll make it easy for you to protect your practice data. Call 1-800-267-ABEL (2235), press 1.

Our Remote Data Backup and Disaster Recovery Virtual Server Services include:

Secure backup over the Internet

- safe, advanced encryption of your data in transport and in cloud storage
- an automated, on-line, remote service with no manual effort required on your part
- access to your data backup when you need it
- a retention schedule preserving data for up to 1 year
- summary reports emailed daily

NOTE: Your server requires access to the Internet via a high speed connection. ABEL will need credentials to log into your system to provide some of the services. An ABEL technician will contact you to make appropriate arrangements.

Assistance from ABEL experts

- data restoration of your cloud backup to your local server if your local server is immediately available
- if a disaster leaves your server unavailable for days we will restore your cloud backup to a virtual server in the cloud – providing emergency access to your ABEL data (e.g. appointments and financials) typically within 2 to 24 hours
- a virtual server, if required, will be available for 2 users to run ABEL for up to 1 month

Pricing¹

	Monthly	Initial
